

Tower Filter Press Replacement Parts Manufactured by Composittech

Close-up of Notched Grid

High Temp Polypropylene Fiberglass Grids

Composittech manufactures filters and filter replacement parts for a variety of vacuum filters including tower filter presses, belt press filters, drum and disc filters, and horizontal belt filters. We focus on designing improved products to optimize filter performance for the mining, mineral processing, chemical, and food industries. We currently manufacture and supply replacement parts for a range of tower filter presses. This technology offers large capacity, improved

cake washing, low cake moisture content, and increased process recoveries in operation.

Composittech manufactures a three piece custom interlocking polypropylene fiberglass grid which replaces a complete plate chamber in the **Larox** tower filter press. Composittech grid panels are designed to provide better drainage and offer a larger cross section for less belt drag. Our grids interlock allowing for an even surface across the face of the grid with no molded tab on the underside. In our experience, the molded tab on a **Larox** grid easily breaks off causing the grid to slide under the belt and raise during belt transfer. The resulting unnecessary filter media wear is eliminated with our grid design.

Composittech's plate gasket for **Larox** filters is made of EPDM rubber and natural rubber for a firm filter plate seal and we manufacture plate blocks of UHMW-PE. We also provide our customers with cloth scrapers and roller scrapers for **Larox** filters which we make of urethane and EPDM rubber.

Our goal is to improve production capacity, minimize the potential for non-scheduled shutdowns, and reduce maintenance requirements for our customers. Composittech ships machine-ready parts for installation by your own crew or our service group is available for installations.

We supply replacement parts for Larox, Bethlehem, Hoesch (Pannevis), Westech, Krauss Maffei and most other brands of filtration equipment.

Composittech is not an authorized replacement parts supplier or service supplier for Larox or Hoesch (Pannevis) brands of process equipment; nor is it in any way associated with Outotec Inc. or its affiliated entities. All of our improved design replacement parts are manufactured by and warranted by Composittech.
